## Education

- 2021 –  **Ph.D.** Biomedical Engineering.  
University of Southern California, Los Angeles, California, USA.
- 2017 – 2019  **M.S.** Computer Science.  
University of Southern California, Los Angeles, California, USA.
- 2013 – 2017  **B.Tech.** Computer Science and Engineering.  
Vellore Institute of Technology, Vellore, Tamil Nadu, India.

## Research Experience

- 2018 –  **Graduate Research Assistant, PhD student**  
Aging & Imaging Laboratory, USC.

*Local Brain Age.* Trained a deep neural network (DNN) using PyTorch to predict biological age of a magnetic resonance imaging (MRI) brain scan to map heterogeneous mapping of aging processes in healthy populations. [Article in press at PNAS] [1]

*Brain evolution Generative model.* Synthesized high-resolution, participant-specific future (follow-up) MRI using a novel 3D hybrid ControlNet + diffusion model from baseline MRIs of healthy adults, potentially assisting in the prognosis of aging-related brain diseases [27].

*Neuroimaging Saliency comparison.* Assessed 7 saliency methods for neuroanatomic interpretability in DNNs estimating biological brain age from MRIs, recommending Integrated Gradients as the best approach [10].

*Brain age calculation.* Trained a deep neural network using TensorFlow to predict biological age of a MRI brain scan. [GitHub] [2]

*Brain CT segmentation.* Developed an automated human head computed tomography (CT) volume segmentation software to calculate white and gray matter volumes for a cross sectional analysis of brain atrophy rates in an atypical population at exceptionally low risk for dementia. Further additions to the software include parcellation of the white and gray matter volumes into more than 160 brain regions [29], [9].

*Tractography generation.* Developed a pipeline to generate models of white matter fibers (tracts) using diffusion MRIs.

*Resting state fMRI connectivity in AD vs. TBI.* Computed resting state functional connectivity patterns of Alzheimer's disease (AD), traumatic brain injury (TBI) and cognitively normal participants [18].

*Neuroimage cloud computing.* Managed AWS S3 and EC2 cloud computing instances for neuroimaging analyses.

*System Administrator.* Configured, installed, and maintained HPE Linux servers. Installed and configured NVIDIA A100 GPUs for deep learning projects.

Department of Biomedical Engineering, Viterbi School of Engineering, USC.

- 2022  **DICOM Anonymizer.** Developed an open source DICOM (digital medical images) de-identification software. Features include support for customized anonymization through severity levels ('soft', 'medium', 'hard') and selection of individual DICOM tag to anonymize based on user requirements. [GitHub]

School of Computer Science and Engineering, VIT.

## Research Experience (continued)

- 2016 - 2017     **Undergraduate Research Assistant**  
*Prediction of yoga postures.* Developed hardware and a bespoke Android application to track body vitals and predict beneficial postures [21].
- 2016     *Alteration of Advanced Encryption Standard.* Compared execution times of Advanced Encryption Standard (AES) encryption and decryption based on number of rounds.  
*Chemistry simulation (Eureka).* Simulated chemical reactions at atomic level using basic animations on Java, Oracle 11g and Greenfoot.
- 2015     *Fitness Tracking system using Arduino.* Developed a low-cost pedometer to track calorie expenditure, participant velocity, and ground distance covered.  
*Detecting and preventing SQLIA.* Implemented a demonstration of SQL injection attacks (SQLIA), its detection and prevention.

## Employment History

- 2017     **Intern** VirtusaPolaris North Plainfield, New Jersey, USA  
Developed a Business Process Management (BPM) application using Pega Rules Process Commander (PRPC) to model, automate, execute, control, measure and optimize business activity flows [19].
- 2014     **Intern** Persistent Systems Nagpur, Maharashtra, India  
Calculated user engagement on twitter data using transformations and aggregations with Elasticsearch, Kibana and JSON [40].

## Awards, Grants and Patents

- 2026  **GeroScience Publication Award Honorable Mention** *The American Aging Association*  
Honorable mention at American Aging Association 54rd Annual meeting for Increases in regional brain volume across two native South American male populations [9].
- 2024-26  **Honorarium** *CURVE Mentor at Viterbi School of Engineering, USC*
- 2025  **US Patent** A Irimia & **N. N. Chaudhari** *Regional segmentation and parcellation of the human cerebral cortex from computed tomography*. Stevens Center for Innovation, University of Southern California. Disclosed on March 6, 2023 under application no. 2023-079. Provisional patent application 63/530,881 filed with USPTO on August 4, 2023 under submission no. 71523-43150. Application for conversion to non-provisional patent filed on August 5, 2024 under US patent application 18/794,766.
-  **Scholarship Award** *India Conference at USC*  
Conference organized by USC Marshall school of Business and the South Asian Business Association (SABA) to advance the South Asian community academically and professionally.

## Awards, Grants and Patents (continued)

- 2024

**Resource Award** *National Artificial Intelligence Research Resource*  
*Generative models of neuroimages for personalized assessment of risk for Alzheimer's disease.* 500 Node hours on TACC Vista with a NVIDIA GH100 Grace Hopper Superchip GPU. Award ID NAIRR240132.

## Mentoring and Leadership

- 2024, 2025

**IUSSTF-Viterbi mentor** Mentored undergraduate students during summer through the Indo-US Science and Technology Forum – Viterbi program.
- Fall 2021,  
2024 – 2025

**CURVE mentor** Mentored undergraduate students through Center for Undergraduate Research in Viterbi Engineering (CURVE) assisting them to explore research areas. Trained the students in technical knowledge and interpersonal skills required to become successful researchers.
- 2018 – 2019,  
2021 – 2022, Fall 2024

**Viterbi Graduate mentor** Mentored new graduate students during their transition to USC.  
  
*Hindu Student Organization*
- 2018- 2019

**Program Manager** Organized events including Diwali and Janmashtami for the Indian community at USC.
- 2017- 2018

**Volunteer** Organized events including Janmashtami and temple trips.

## Additional academic work

- 2026

*Nature Progress Brain Health*  
**Jornal Article Reviewed** An age-adaptive multimodal biomarker panel for mixed-pathology brain health.
- 

*npj Dementia*  
**Jornal Article Reviewed** Investigating Individual Differences in Brain Structure for Brain Disorder Diagnosis: Insights from Aging, Genetics, and Modifiable Factors.
- 

*Imaging Neuroscience*  
**Jornal Article Reviewed** Heterogeneous Brain Aging of Cerebral Networks in Subjective Cognitive Decline.
- 2025

*Brain Structure and Function*  
**Jornal Article Reviewed** Occupational Circadian Disruption and Brain Structure: Evidence from Normative Developmental Brain Lifespan Trajectories.

## Additional academic work (continued)

IEEE International Symposium on Biomedical Imaging (ISBI) 2026  
**Conference Articles Reviewed**

1. RadGaze-LLM: Anatomical Region-Grounded Radiology Report Generation via Learning from Expert Gaze (Paper number 1571222455).
2. Mitigating Affirmation Bias in Vision-Language Models for Medical Image Segmentation (Paper number 1571220336).
3. Structure-Dynamics-Informed ICA Model for Functional Brain State Estimation (Paper number 1571226515).

IEEE Transactions on Medical Imaging  
**Journal Article Reviewed** Brain Age Prediction via Adversarial Training and Multi-Model Evaluation: A Region-Specific Analysis of Aging Differences in Parkinson’s Disease (Manuscript Number TMI-2025-1273).

Neuroimage: Clinical  
**Journal Article Reviewed** Associations of traumatic brain injury with markers of brain health among older men in the Vietnam Era Twin Study of Aging (Manuscript Number NICL-24-799).

2024 Neuroimage  
**Journal Article Reviewed** Age- and Sex-specific Normative Curves for Intracranial and Ventricular Volumes from Head CT Scans (Manuscript Number NIMG-24-1486).

USC Viterbi School of Engineering

2023 **Finalist** in the three-minute thesis (3MT) competition.

2022 Presentation on basics of Linux terminal.

ENIGMA-U (a free online school focused on neuroscience) Presentation about basics of human brain structure and aging.

## Professional Memberships

2025 - IEEE Signal Processing Society and IEEE Young Professionals.

|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Reproducibility               | ■ xAI (integrated gradients, SHAP), explainable model design, open-source tool development                                       |
| Cloud & Infrastructure        | ■ AWS (EC2, S3), Google Cloud (GCP), GPU cluster administration, cost-aware resource optimization                                |
| Software Engineering          | ■ Python, C++, Java, MATLAB, Linux/bash, OOP, GitHub actions, CI/CD, production-ready code development                           |
| Data & Tools                  | ■ pandas/numpy, ETL pipelines, Elasticsearch, Kibana, SQL, JSON, Oracle 11g                                                      |
| Design                        | ■ Adobe Creative Suite (Photoshop, Illustrator, Audition).                                                                       |
| Collaboration & Communication | ■ Cross-functional research collaboration, project ownership and autonomy, translating complex research into practical solutions |
